Class Learning Topics 2017

3D

Subjects	Autumn		Suggestions for home learning (if appropriate)
English	We are looking at how to make our writing interesting so others want to read it. This includes basic punctuation as well as finding out about how to extend sentences using interesting adjectives and adverbs; connectives or joining words; and complex sentences, which drop extra information into the writing.	Our English this half term will be focussed on <i>Charlie and the Chocolate Factory</i> by Roald Dahl. We will be discussing the story, sharing our opinions and using it to help us write for a range of different purposes.	Read to an adult regularly at home or if they are reading independently discuss the books they have read and answer questions about the text. Access Bug Club online (if they are using this series of books, you will have been sent a login, which is in their school diary). Read on their own, or together with an adult, other books by Roald Dahl. Find out more about Roald Dahl and his books using the website https://www.roalddahl.com/home/kids
Maths	We will be covering a range of different mathematical topics this term including: Number (place value, addition, subtraction, multiplication and division, fractions and decimals) Algebra Measurement Geometry (shapes, position and direction) Statistics (graphs, charts and interpreting information)		Practice times tables regularly until children can answer questions quickly and out of order to aid speed and accuracy. https://www.activelearnprimary.co.uk/login?e=-1&c=0 To access Abacus activities online. (Logins to be sent home.)

Class Learning Topics 2017

Science	<p><u>Sound</u> We will be thinking about how different objects and instruments make sound, how that sound travels to our ears and how our ears work. Students will be encouraged to work as scientists asking questions, making predictions, observing carefully, checking their results and drawing conclusions. We will be using what we have learnt to solve a problem by creating a fair test.</p> <p>Later in the term, we will be developing our understanding of sound further looking at how it travels in waves and how these waves change. We will also be planning investigations with increasing independence looking at the importance of changing only one variable.</p>	<p><u>Forces and magnets</u> Children will compare how things move through push and pull and on different surfaces. Children will work scientifically to raise questions and carry out experiments. The children will explore and make predictions about how magnets attract or repel each other and attract some materials but not all materials.</p>	<p>You could explore sound together using BBC Bitesize for Key Stage 2 http://www.bbc.co.uk/bitesize/ks2/science/physical_processes/sound/read/1/ BBC Bitesize for Key Stage 3 develops the understanding of sound further http://www.bbc.co.uk/education/guides/z8d2mp3/revision</p> <p>You could visit the science museum at London.</p>
ICT	<p>This term we are learning to be programmers and creating animations using Scratch</p>	<p>Opportunity to use and play on Scratch to find out what it can do and to practise the skills we will be using in class http://scratch.mit.edu (This is available for free and you don't have to create a log-in or download anything to use the software) Children should be encouraged to use ICT where possible but not over exposed to devices.</p> <p>Use links on our school website for encouraging safe use of ICT. http://grovehouseschool.co.uk/staying-safe-online/</p>

Class Learning Topics 2017

PSHE	Friendship.	
Language Skills	<p>-Developing word knowledge and word usage through pre-teaching vocabulary pertaining to core subject areas across key stages of learning. Vocabulary is taught using a conceptual map focusing on various morphological and semantic word properties, i.e. sound unit, syllable unit, word class, definition, and meaningful syntactical use.</p> <p>-Developing skills in the area of syntax and grammar using key methodologies such as, 'Break it Down + Build it Up', 'Shape Coding', and 'Colourful Semantics' approaches. Students develop their ability to use meaningful complex sentences that are grammatically correct.</p> <p>-Developing higher order reasoning skills using 'Blanks Levels of Questioning'. Students develop their ability to interpret abstract language, i.e. infer meaning, provide explanations, make predictions, problem-solve, and demonstrate reasoning skills.</p> <p>-Developing spoken and written narrative skills through explicit instruction on narrative features linked to key stage learning fictional texts. Opportunities are given to students to develop skills such as, sequencing story events cohesively, using a range of story grammar elements, and providing sufficient detail.</p>	
Social Skills	<p>-Promoting social communication and social interaction skills using explicit teaching approaches, such as, 'Language Builders' (Elkan), and 'Talkabout' (Alex Kelly). Students develop skills in the key areas of: awareness of self and others, non-verbal Behaviour (body language and paralinguistic skills), verbal Behaviour (conversational skills), and assertive Behaviour.</p>

Class Learning Topics 2017

<p>Humanities</p>	<p>3D will be learning about World War 2. We will be looking at the events that led up to the war, evacuation, rationing, the role of woman. Students will have the opportunity to do some role-play and see actual footage of World War 2 events.</p>	<p>Linking with History last half term, students will study Judaism for the RE element of Humanities. We will look at the main beliefs, holy book, place of worship and the modern community.</p>	<p>Go to the library or use the internet to find out more about World War 2 and Judaism.</p>
<p>Art</p>	<p>3D will be completing a drawing unit this half term. They will be studying the artist Hunderstwasser and drawing in the style of Hunderstwasser. They will also be studying still life using natural form as a starting point. Lastly 3D will learn to use positive and negative drawing techniques in response to the work of Frank Auerbach</p>	<p>3D will be completing a textiles unit this half term. They will be exploring patterns from different cultures and transferring their designs to dip dyed fabric. 3D will also be making collograph blocks and printing their designs onto fabric. Lastly, 3D will make plasticine relief block and explore printing onto different surfaces.</p>	<p>Go to the library or search the internet to research the artists: Hunderstwasser and Auerbach.</p> <p>Visit an art gallery and discuss different paintings with your family.</p> <p>Practise your drawing skills at home.</p>
<p>Music</p>	<p><u>Environment</u> Children will create accompaniments and sound pictures to reflect the sounds in their local environment. Songs and poems about places will be used to explore music.</p> <p><u>Building</u> Children will play games, sing and compose music to build into a performance. They will learn about the sights and sounds of a building site to provide the inspiration for exploring and creating rhythms.</p>	<p><u>Sounds</u> Children will explore how instruments can be classified according to the sounds they produce. Children will be introduced to Music from around the world and different timbres and structures as they create musical conversations.</p> <p><u>Poetry</u> Children will explore three contrasting poems, using voices, body percussion, instruments and movement to create their own expressive performances.</p>
